Education

Eleanor Roosevelt High School 2020 - 2024
Activities: Wind Ensemble, Marching band Saxophone section leader, Saxophone quartet *Eastvale, CA*

University of California San Diego 2024 - Present
Activities: UC San Diego Archery Team *La Jolla, CA*

Experience

Assistant Coach Jan. 2022 - Jan 2024
Riverside Archery JOAD *Riverside, CA*

- Provided feedback on the form of the students
- Assist in leading the class through warm ups
- Manage the line to assure safety

Saxophone Section Leader June 2022 - May 2023
ERHS Marching Band *Eastvale, CA*

- Hosted and provided feedback to others through sectionals
- Providing reminders to members of the section

Projects

Sweet but Healthy? Evaluating Honey vs. Sugar in Recipes Jan. 2026 – Mar. 2026

- Analyzed real-world Food.com recipe data to compare nutritional values between honey-based and sugar-based desserts
- Cleaned recipe data by handling missing values and filtering ingredients to isolate desserts containing honey or sugar
- Conducted permutation tests to evaluate whether the perceived "health halo" of honey was supported by measurable nutritional differences

League of Legends Analysis: Wards vs. Dragons Nov. 2025 – Dec. 2025

- Analyzed League of Legends World Championship data to study the relationship between wards placed and dragons secured by a team
- Cleaned gameplay data by assessing missingness, identifying outliers, and preparing features for analysis
- Created visualizations to explore relationships between vision control and objective control
- Built a Random Forest model using scikit-learn to predict the number of dragons secured based on ward-related features

Drying Out Atlas May 2026 – Jun. 2026

- Built an interactive data visualization project analyzing 25 years of NASA MODIS NDVI satellite data across the Americas
- Used regional trend slopes and statistical significance testing to compare vegetation momentum across major geographic regions
- Designed a scroll-based storytelling website explaining how high vegetation density can mask weak long-term ecological growth
- Implemented an interactive NDVI heatmap viewer allowing users to scrub through time, compare months, and inspect regional vegetation trends

Technical Skills

Languages: Java, Python, JavaScript, R
Libraries: pandas, NumPy, Matplotlib, scikit-learn, D3.js, Scrollama

Languages

English: Native Proficiency
Spanish: Bilingual Proficiency
Chinese: Limited Working Proficiency
